I'm originally from Ukraine and currently based in Switzerland. I have been programming for almost five years. My journey began at a local IT school, where I gained valuable experience and knowledge. Alongside this, I worked on personal projects and expanded my skills further during university. I also participated in European competitive programming events, which strengthened my critical thinking and provided a solid foundation.

Currently, I work as a Junior Fullstack Developer, with a primary focus on backend development.

## WORK EXPERIENCE

### ■ March 2024 - PRESENT

Beat Bucher AG | Switzerland
